

UROLOGY & ANDROLOGY PRECEPTORSHIP

15-16 September 2023

Istanbul Bağcılar Eğitim ve Araştırma Hastanesi

Thursday - Arrivals

Course Day 1 Friday

URINARY INCONTINENCE

The objective of this course is to provide urologists with the knowledge and skills needed to effectively diagnose and manage urinary incontinence in men and women. Through a combination of didactic lectures, case discussions, and live surgeries, participants will gain an understanding of the epidemiology, pathophysiology, and diagnosis of urinary incontinence. They will also learn about the various conservative and medical management options available, including behavioral therapy, pharmacotherapy, and surgical interventions such as sling procedures, trans obturator tape, and artificial urinary sphincters. The live surgeries will provide an opportunity for participants to observe the surgical techniques for trans obturator tape for stress urinary incontinence in women and artificial urinary sphincter for post-prostatectomy incontinence in men. By the end of the course, urologists will be able to develop an individualized treatment plan for their patients with urinary incontinence and will be equipped to make informed decisions regarding the most appropriate treatment option based on the patient's needs and preferences.

09:00-09:20 AM	Stress Incontinence in Men and Women: Epidemiology, Etiology	Ahmet Tahra
09:20-09:40 AM	Pathophysiology and Risk Factors to Incontinence	Murat Dinçer
09:40-10:00 AM	Assessment and Diagnosis of Incontinence	Murat Dinçer

10:00-10:20 AM Coffee Break

10:20-10:40 AM	Conservative and Medical Management of SUI	Burhan Coşkun
10:40-11:00 AM	Surgical Management of SUI in Women	Burhan Coşkun
11:00-11:20 AM	Surgical Management of PPI in Men	Murat Dinçer
11:20 - 12:00 PM	Case Discussions	

12:00-13:00 PM Lunch

13:00-14:00 AM	Live Surgery of AUS for Post-Prostatectomy Incontinence	Ahmet Tahra, Murat Dinçer
----------------	---	----------------------------------

14:00-15:00 PM	Live Surgery of TOT for Stress Urinary Incontinence	Murat Dinçer, Burhan Coşkun
----------------	---	------------------------------------

15:00-15:20 PM	Conclusion and Discussion	
----------------	---------------------------	--

Social Program

Day 2 Saturday

ERECTILE DYSFUNCTION

The objective of this course is to provide urologists and andrologists with the knowledge and skills needed to effectively diagnose and manage erectile dysfunction. Through a combination of didactic lectures, case discussions, and live surgeries, participants will gain an understanding of the epidemiology, pathophysiology, and diagnosis of ED. They will also learn about the various conservative and medical management options available, including behavioral therapy, pharmacotherapy, and surgical interventions such as infra pubic techniques, and penoscrotal technique. The live surgeries will provide an opportunity for participants to observe the recent surgical techniques. By the end of the course, urologists and andrologists will be able to develop an individualized treatment plan for their patients with ED and will be equipped to make informed decisions regarding the most appropriate treatment option based on the patient's needs and preferences.

09:00-09:20 AM	Anatomy of Erectile Function	Metin Öztürk
09:20-09:40 AM	Physiology of Erectile Function	Aykut Çolakerol
09:40-10:00 AM	Etiology and Risk Factors for Erectile Dysfunction	Caner Baran
10:00-10:20 AM	Evaluation of the Patient with Erectile Dysfunction	Tuncay Taş

10:20-10:40 AM Coffee Break

10:20-10:40 AM	PDE5 inhibitors: Pharmacological Effects for ED	Mustafa Kadıhasanoğlu
11:00-11:20 AM	Intracavernosal Therapy for ED	Murat Dursun
11:20-11:40 AM	Testosterone Replacement Therapy for Patients with ED	Arif Kalkanlı
11:40-12:00 PM	Regenerative Medicine for ED Therapy	Yaşar Başağa

12:00-13:00 PM Lunch

13:00-13:20 PM	Oral Pharmacotherapy in the Treatment of ED	Mustafa Kadıhasanoğlu
13:20-13:40 PM	Penile Prosthesis Surgery with Penoscrotal Technique	Ateş Kadioğlu
13:40-14:00 PM	Penile Prosthesis Surgery with Infrapubic Technique	Lütfi Canat
14:00-14:20 PM	The Management of Complications after Penile Prosthesis surgery	Ateş Kadioğlu

14:20-14:40 PM Coffee Break

14:40-15:00 PM	Ectopic Reservoir Choices for Penile Prosthesis	Ateş Kadioğlu
15:00-15:20 PM	How to Manage ED Patients with Peyronie's Disease	Ateş Kadioğlu
15:20-15:40 PM	The Treatment of ED Patients after Radical Prostatectomy	Murat Şambel
